

## **Release Notes**

### **Belimo Energy Valve™ Software Version 3.1.1**

**Date: October 25<sup>th</sup>, 2018**

Data protection is a question of trust, and your trust is important to us. This software update will therefore change the time that device ownership information is transferred to the Belimo Cloud. Previously this information was transferred once a device owner was assigned and internet connection was established. With this update, the ownership information will not transfer until the device is claimed in the Belimo Cloud. This update will not have any impact on the user experience.
